

Letter: Propose realistic changes at BMC

Posted Wednesday, July 26, 2017 5:33 pm

To the editor:

I have worked for Berkshire Health Systems for over 20 years. During this time I have supported various departments while working with senior leaders throughout the hospital. I can say with 100 percent certainty that patient care and patient safety have always been our top priority.

I want our local community hospital to continue to be a strong, vibrant and safe facility for me, my family and my neighbors. I encourage the staff who feel we need to realign staffing to suggest reasonable changes that are realistic in today's health care environment

Rachel Tomkowicz,

Adams
